MEMORANDUM FOR: H. Gates Lloyd

Gates:

25X1A9A

[redacted] telephoned and said that he would need more space within the next three to four weeks. He needs the equivalent of the second floor of 2210 "E" Street in addition to what he already has.

One immediate problem is office space with his staff at 2210 "E" Street, or wherever they may be, for his new deputy for this Project. This will be an Air Force officer, either a Brigadier General or a Colonel about to be promoted to the grade of Brigadier General. This individual is not difficult to please, but should have a comfortable office.

Dick suggests that we explore the possibility of getting a part [redacted] inasmuch as Defense Department units, he understands, are now phasing out. He also suggests that if this could be done the ORR unit now at 2210 "E" Street might well move there. He would prefer to remain at 2210 rather than be moved [redacted]

I don't think that there is much chance of getting any space [redacted] although it might be explored. It might be that the best solution would be to block off a section of the space vacated by TSS in the [redacted] area and move his Project down there. If this should be done, Dick would want a parking space in that immediate vicinity so that he could drive his own car down there from time to time and have a place to park. In any case, we will have to solve this problem and it should be done without delay.
